ACCESS CONTROL

GSM Access control system

Gate-keeper is a GSM access control system which is by far the easiest and most convenient system to use. Our system is installed in thousands of homes and complexes around the world.

Crowbar Gang? Gate-keeper takes care of the security of your property by notifying you if someone forces your gate open.

Keep tabs on your security company Gate-keeper will alert you when your security company opens your gate.

Easily Maintain Lists Control who enters your property and when they may do this. Our intuitive internet web based scheduling allows you to configure up to 1000 numbers.

No hassle We supply the Gate-keeper with a contract sim-card which means you never have to worry about being locked outside because you forgot to top up the airtime. The Rica process is eliminated because Gate-keeper is responsible for the simcard.

No contract We charge a nominal amount of R 150.00 annually for domestic users (limited to 15 cell phone numbers) and R 500.00 for commercial users which allows unlimited numbers.

No bank details required The registration process does not require bank details or credit card payments.

Installation of the gate-keeper should not take more than a few minutes. Any gate or garage door motor can have a gate-keeper fitted to it. An added bonus is that you can get email alerts of who is opening your gate.

Two outputs The product allows certain users to have full control of the gate and others may only have pedestrian access.

Audit trail Gate-keeper reports transactions to our web-server. You can log in and view this info anytime.

- POPI compliant
- 12 Month Factory Warranty
- Compatible with all garage door motors and gate motors
- 10 amp relay switches
- 12 Volt

How it works

Step 1 Register your Gatekeeper & edit your schedule

Step 2 Install your gatekeeper in a few minutes

Step 3 Open your gate with a free missed call

Step 4 View reports live online to check who entered and when
